

COLOUR QUALITY POLICY

Colour Management Policy – Colour Reproduction.

The Sherwood Group operates a colour management system that meets the requirements of the ISO 12647/2: 2004 (Version 2.1 August 2015) BPIF guidelines for Pre press, proofing and Press including. This is for the production of Offset Lithography.

It is our policy to ensure compliance through the Bodoni PressSIGN validation software, business systems, process controls, training and development.

Our aim is to ensure customer satisfaction through accurate colour proofs and printing for all jobs, produced to the ISO 12647/2 standard.

We will ensure that we control the following elements of our system, maintain records of measurement including, where appropriate, investment and calibration for the following:

- Colour viewing lighting conditions ISO3664:2009
- Digital colour management workflow including ICC profiles
- Digital proofing to ISO 12647/7
- Process printing inks ISO 2846/1
- CTP digital plate output
- Print process controls
- Training and development

This policy will be communicated within the business and to other interested parties via the company web site.
