

ENVIRONMENTAL & CSR POLICY

The Management and all who work at The Sherwood Group are committed to the care of the environment and the prevention of pollution. The Company makes three core policy commitments, continual improvement of our environmental performance, prevention of pollution and legal compliance.

The organisation ensures that all its activities, products and services are carried out in conformance with the applicable legislation which relate to its environmental aspects.

The organisation operates processes which are prescribed under the Environmental Protection Act 1990: part 1, and observes the requirements laid down by Nottinghamshire County Council and the Environment Agency.

The organisation seeks to minimize waste, promote recycling, reduce energy consumption, reduce harmful emissions and work with suppliers who themselves have sound environmental policies.

An essential feature of the environmental management system is a commitment to improving environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. The objectives and targets are publicized throughout the organisation and all staff are committed to their achievement.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system which satisfies the requirements of BS EN ISO 14001:2004.

The company promotes work with local communities and charities to support worthy causes.

The company encourages and supports its employees and associates involved in charitable fund raising activities.

The company works with ethical trading initiatives supported by a 4 pillar Sedex Members Ethical Trading Audit.

This policy and the obligations and responsibilities required by the environmental management system have been communicated to all persons working for or on behalf of the Company. The Policy is available to the public on request.
